System Programming
Kernel Lab Report

Lee Young Jae

2016-11988

1. Kernel Lab

Short project description

The goal of the kernel lab is to...

2. Implementation

describe your design, implementation, way to solve the lab

The Kernel lab consists of two phases: ptree and paddr.

2.1. Ptree

explain what you did to solve this phase in detail

2.2. Paddr

explain what you did to solve this phase in detail

3. Conclusion

Explain what you have learned in this lab. What was difficult, what was surpsrising, and so on.

- do not copy-paste screenshots of your code. Format it properly as text

- length: do not exceed 5 pages. There is no lower limit, but one page is probably not detailed enough.
